

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer position at your organization. I am a B.Tech student with **approximately one year of hands-on experience in Java Full Stack Development**. I have experience working with Java, Spring Boot, Spring Security, REST APIs, microservices, SQL, PostgreSQL, React.js, and Hibernate. I am passionate about building scalable applications and solving problems through clean and efficient code.

During my experience at Techouts, I gained practical exposure to software development and enterprise application development. I have also worked on several projects using Spring Boot and microservices. In my e-commerce application, I developed services for product management, shopping carts, orders, and user authentication. I implemented JWT-based authentication and authorization, RESTful APIs, JPA/Hibernate-based database integration, and service-to-service communication using Feign clients.

Additionally, I developed a real-time chat application using Spring Boot, Spring Security, WebSocket/STOMP, React.js, PostgreSQL, and JWT authentication. These projects strengthened my understanding of backend development, API design, database management, security, and distributed application architecture.

Alongside my development experience, I regularly practice Data Structures and Algorithms to strengthen my problem-solving skills. I am a quick learner, comfortable working with new technologies, and eager to contribute to a collaborative engineering team while continuing to grow as a software engineer.

I would appreciate the opportunity to discuss how my **one year of hands-on experience**, technical skills, and project work can contribute to your organization. Thank you for considering my application. I look forward to hearing from you.

Sincerely,
Manoj Kasu
