MANOJ KASU

Java Full Stack Developer

9347878233 | kasumanoj81@gmail.com | LinkedIn | GitHub | Hyderabad, India

PROFESSIONAL SUMMARY

Results-driven Java Full Stack Developer with hands-on experience building scalable backend microservices, RESTful APIs, and responsive web applications. Proficient in Java, Spring Boot, Spring Security, React.js, PostgreSQL, and Docker. Strong foundation in Data Structures & Algorithms, Object-Oriented System Design, secure authentication (JWT), and real-time messaging architectures.

WORK EXPERIENCES

Full Stack Java | Trainee

Jan 2026 - Jun 2026

Techouts — *On-site · Hyderabad, India*

- Developed and maintained **full-stack web applications** using **Java, Spring Boot, React.js, REST APIs, and PostgreSQL**, delivering **10+ end-to-end features** across multiple application modules.
- Built **20+ RESTful APIs and Spring Boot microservices** for user management, authentication, and business workflows, improving backend integration across **5+ modules**.
- Developed **15+ reusable React.js components** and integrated them with backend APIs, streamlining frontend-backend communication and improving application usability.
- Implemented **Spring Security, JWT authentication, and RBAC** for **3+ user roles**, securing protected resources and API endpoints.
- Designed and optimized **10+ PostgreSQL tables and JPA/Hibernate data-access layers**, reducing database query response times by approximately **20%**.
- Used **Git/GitHub and Postman** for version control, API testing, debugging, and collaborative development, contributing to **30+ API test scenarios** in an Agile/Scrum environment.

Technologies / Skills Used : *React, Java, SpringBoot, SpringDataJpa, Hibernate, PostgreSQL, Docker*

Java Full Stack Intern | Internship

Jun 2025 - Dec 2025

Techouts — *Hyderabad, India*

- **Architected 4 backend microservices** and **15+ REST APIs** using **Java 17, Spring Boot, and Spring Data JPA** for scalable service communication.
- **Engineered PostgreSQL schemas** with **Hibernate ORM**, optimizing **10+ complex queries** for efficient data retrieval across high-traffic endpoints.
- **Built responsive React.js SPAs** with **10+ reusable UI components**, delivering interactive interfaces and improved client-side performance.
- **Implemented Spring Security and JWT authentication**, securing **15+ REST endpoints** with role-based authorization across **3 user roles**.
- **Contributed to 20+ development tasks** in Agile sprints using **Git/GitHub**, resolving high-priority defects through unit testing and debugging.

Technologies / Skills Used : *Java 17, Spring Boot, Spring Data JPA, PostgreSQL, React.js, Spring Security, JWT, Git, GitHub*

PROJECTS

Multi-Role Job Portal System

2026 - 2026

Developer

- **Designed a full-stack job platform** with **RBAC for 2 user roles**, enabling secure and role-specific access for candidates and recruiters.
- **Enabled candidates to apply for jobs** and track application status across **4+ recruitment stages**, from application submission to final decision.
- **Built recruiter workflows** for managing job postings, applications, and candidate pipelines through centralized platform features.
- **Implemented secure role-based authorization** across **15+ platform endpoints**, protecting candidate and recruiter functionality.

Technologies / Tools Used : *Java, Spring Boot, Spring Security, JWT, React.js, PostgreSQL*

Online Code Judge | Github

Developer

- **Engineered an automated code evaluation platform** executing untrusted user code inside isolated, sandboxed **Docker containers**, supporting **3+ programming languages**.
- Implemented real-time test case execution and scoring mechanisms, computing execution time and memory consumption metrics with **sub-second feedback latency**.

Technologies / Tools Used : *Java, Spring Boot, React.js, PostgreSQL, Docker, REST APIs*

Real-Time Instant Messaging System

Developer

- Developed a real-time chat application using **WebSocket** and **STOMP**, enabling low-latency full-duplex communication across 10+ chat endpoints.
- Secured WebSocket handshakes and API routes using **Spring Security** filters and **JWT**, protecting 5+ authenticated endpoints.

Technologies / Tools Used : *Java, Spring Boot, Spring Security, WebSocket, STOMP, React.js, JWT*

E-Commerce Web Platform

Developer

- Built a full-stack e-commerce platform using a **5-service microservices architecture** for scalable application development.
- Developed **user authentication and authorization** services with secure role-based access control for **3 user roles**.
- Implemented **product catalog and shopping cart** services supporting **20+ REST APIs** for product management and customer purchases.
- Developed **order processing workflows** to manage order creation, tracking, and lifecycle updates.

Technologies / Tools Used : *Java, Spring Boot, Microservices, PostgreSQL, React.js*

SKILLS

Databases :	PostgreSQL, MySQL, MongoDB
Frameworks & Libraries :	Spring Framework, Spring Boot, Spring Security, React.js, Redux
Languages :	English, Hindi, telugu
Programming Languages :	Java, JavaScript (ES6+), SQL, Python, C++
Soft Skills :	Data Structures & Algorithms, Object-Oriented Programming, Real-time Messaging, Agile, Scrum
Tools & Platforms :	Docker, AWS Services, Git, GitHub, Maven, Postman, Linux

EDUCATIONS

Sree Chaitanya Institute of Technological and Sciences | Karimnagar, Telangana

CGPA : 8.0/10

B.Tech in Artificial Intelligence & Machine Learning

- B.Tech in Artificial Intelligence & Machine Learning, Sree Chaitanya Institute of Technological and Sciences
- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Web Technologies

Trinity Junior College | Karimnagar, Telangana

CGPA : 69%

Intermediate (MPC)

- **Intermediate (MPC)**, **Trinity Junior College**, Score: 69%
